of Android Phonegap (1.7.0) on my Windows 7 PC it gives me an error: Error: A module with the same name "bust" is already loaded in your application. Please remove one of the duplicate modules in your application. I can build the project successfully on Android device but not on a Windows PC. Is it possible to build on a PC? A: this problem only occurs on windows. It looks like your build script (phonegap/phonegap) is trying to use 'bust' from phonegap/cordova. This invention relates to semiconductor device fabrication and, more particularly, to formation of an annular source/drain region of an array of field effect transistors. Fabrication of integrated circuits involves the formation of conductive contacts between desired electrical devices and supporting structures. A variety of techniques are known to form these contacts. One process is to etch an opening in an f678ea9f9e
